GARD

RENEWABLE INDUSTRY EXPERTS

WHAT WE DO

We offer a variety of consulting & development services to our clients.

GA RD, a Dominican Republic company, with experience in the development of environmental management, especially in recycling programs, has been contributing to the implementation of technically and financially viable models.

GA RD has specific experience in waste treatment, forming a strategic alliance with a management company, foreign manufacturers, and investors, who have implemented solid waste-transforming plants, as well as other technologies in electric power generation across the globe, following clean and sustainable environmental policies.

MARKET RESEARCH

Within our consulting services, our firm includes extensive market research to be able to address all of our client's requirements prior to implementation.

DESIGN & DEVELOPMENT

We focus on designing and implementing technology for renewable energy plants, photovoltaic, wind, and waste-to-energy.

RESOURCES PLANNING

Our firm offers high-performance financing management for large-scale products through our Chinese partners.

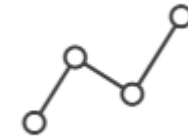

OPERATIONAL MANAGEMENT

With over 15 years of financial and technical implementation expertise, our company offers operational support to our clients.

TECHNOLOGY CONSULTING

We offer high-quality consulting services for the energy sector, encompassing all avenues to design, plan and edify our client's needs.

EXIT PLANNING

Through our financing consultation services, we adhere to smart and flexible financing options for investors in the energy industry.

OUR NETWORK

We are honored to collaborate with prominent businesses & organizations around the world.
