GARD

RENEWABLE INDUSTRY EXPERTS

WHAT WE DO

We offer an array of consulting and development services designed to meet diverse client needs.

Founded in the Dominican Republic in 2015, GARD specializes in environmental management, particularly through innovative recycling and renewable energy initiatives.

We work collaboratively with industry partners, investors, and foreign manufacturers to develop economically viable waste treatment facilities and renewable energy solutions, all while adhering to sustainable environmental practices and policies.

RENEWABLE INDUSTRY EXPERTS

OUR FOCUS

WATER

Water Treatment Systems

WASTE

Waste-to-Energy Plants

WIND

Wind Energy Solutions

SOLAR

Next-gen Photovoltaic Panels

MARKET RESEARCH

Our market research informs all facets of our consulting services, ensuring that we fully understand our clients' needs before implementation.

DESIGN & DEVELOPMENT

Our expertise lies in the design and execution of renewable energy technologies, including photovoltaic, wind, and waste-to-energy projects.

RESOURCES PLANNING

We excel in high-performance financing management (EPC+F) for large-scale projects, leveraging the strengths of our global partners.

OPERATIONAL MANAGEMENT

With over 15 years of experience in financial and technical implementations, we provide expert operational support to ensure project execution.

TECHNOLOGY CONSULTING

Our consulting services are precise and high-caliber, encompassing everything required to design, plan, and fulfill our clients' goals in the sector.

EXIT PLANNING

Through adaptive financing consultation, we align with investors in the energy industry, offering flexible options to maximize returns.

OUR GOALS

TO SECURE OUR PLACE AS A PREMIER ENERGY
CONSULTING FIRM

Since our inception in 2015, we have dedicated ourselves to advancing solid waste management and renewable energy solutions while ensuring affordable service for our clients through trained personnel. We specialize in the import and export of renewable energy materials and technologies.

OUR MISSION

Our mission is to be a trusted partner for our clients, making impactful contributions to environmental sustainability through advanced technology and our extensive global network.

OUR VISION

In the next five years, we aim to become a leading authority in solid waste management and recycling, as well as massive renewable energy projects, promoting a culture of environmental stewardship.
