GARD

RENEWABLE INDUSTRY EXPERTS

WHAT WE DO

We offer an array of consulting and development services designed to meet diverse client needs.

Founded in the Dominican Republic in 2015, GARD specializes in environmental management, particularly through innovative recycling and renewable energy initiatives.

We work collaboratively with industry partners, investors, and foreign manufacturers to develop economically viable waste treatment facilities and renewable energy solutions, all while adhering to sustainable environmental practices and policies.

MARKET RESEARCH

Our market research informs all facets of our consulting services, ensuring that we fully understand our clients' needs before implementation.

DESIGN & DEVELOPMENT

Our expertise lies in the design and execution of renewable energy technologies, including photovoltaic, wind, and waste-to-energy projects.

RESOURCES PLANNING

We excel in high-performance financing management (EPC+F) for large-scale projects, leveraging the strengths of our global partners.

OPERATIONAL MANAGEMENT

With over 15 years of experience in financial and technical implementations, we provide expert operational support to ensure project execution.

TECHNOLOGY CONSULTING

Our consulting services are precise and high-caliber, encompassing everything required to design, plan, and fulfill our clients' goals in the sector.

EXIT PLANNING

Through adaptive financing consultation, we align with investors in the energy industry, offering flexible options to maximize returns.

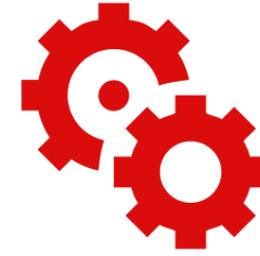

GARD

RENEWABLE INDUSTRY EXPERTS

OUR NETWORK

We take pride in partnering with prominent organizations to foster global collaboration.

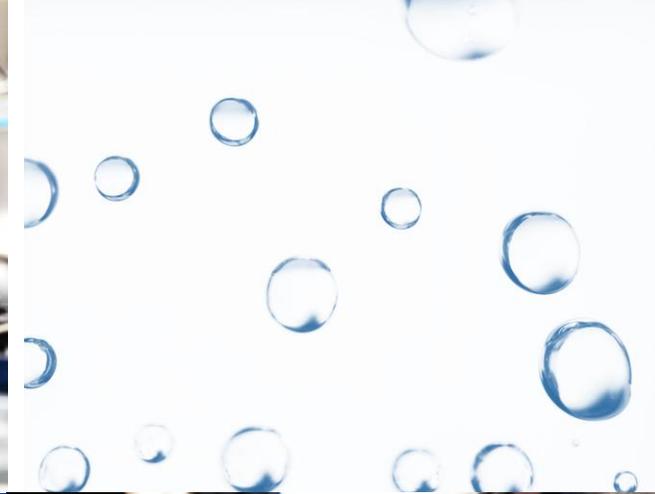

GARD

RENEWABLE INDUSTRY EXPERTS

OUR PARTNER

We specialize in engineering projects, supply, manufacturing, and technical services for water treatment systems tailored to a variety of applications.

G3SIS
GESTIÓN EMPRESARIAL DE SISTEMAS INTEGRALES SOSTENIBLES

OUR PARTNER

SPECIALISTS IN ADVANCED WATER
TREATMENT SYSTEMS

G3SIS (Gestión Empresarial de Soluciones Integrales Sostenibles) represents the synergy of companies with over 26 years of dedicated service to the Latin American industry. Through the G3SIS Water Division, we undertake engineering, supply, manufacturing, installation, commissioning, and technical service projects specifically focused on advanced water treatment systems for a wide range of applications.

Our partnership with G3SIS enables us to leverage extensive expertise and innovative solutions, ensuring that our clients receive top-quality services that meet the highest standards of efficiency and sustainability. Together, we are committed to addressing the complex challenges of water treatment, delivering reliable solutions that enhance both operational performance and environmental stewardship.

SERVICES & SECTORS

- ✓ DRINKING WATER
 - ✓ SANITATION
 - ✓ CONSTRUCTION
 - ✓ OIL & GAS
 - ✓ INDUSTRIAL
 - ✓ AGRICULTURAL
-
- MANUFACTURING
 - INSTALLATION START-UP
 - DESIGN & SIMULATION
 - OPERATION
 - INTERVENTION
 - MAINTENANCE

SUPPLY & ENGINEERING

We form strategic alliances with global and local suppliers to utilize cutting-edge technologies for project development. Our interdisciplinary team of specialists ensures that every project benefits from integrated expertise.

This collaborative approach enhances efficiency and innovation, allowing us to deliver reliable and sustainable solutions that meet our clients' evolving needs in the water treatment sector.

WATER PROJECTS

With over 20 years of experience and successfully executing more than 500 projects, our expertise is built on solid foundations of customer service, project management, technical standards, and unwavering ethical principles.

We provide tailored cost-benefit analyses for our projects, ensuring alignment with specific client needs while offering comprehensive post-sale support. Our commitment to innovation means we continuously stay abreast of the latest technological trends, thereby delivering the most effective solutions available worldwide.

Our goal is to implement and operate cutting-edge solutions that not only meet today's demands but also anticipate future challenges in the water systems industry. We take pride in our professional approach, ensuring that every project reflects our dedication to excellence and sustainability.

SEWAGE TREATMENT

Preliminary Treatment

- Roughing
- Desander
- Separator
- Fats & Oils

Primary Treatment

- Flotation Systems
- Chemical treatment

Aerobic Systems

- MBR
- MBBR
- SCAI
- SBR

Anaerobic Systems

- UASB
- ECSB

Reuse Systems

- Water
- Rain

POTABLE WATER TREATMENT

Pre Filtering

- Self-cleaning filters
 - Hydrocyclones
- Cartridge Filters
- Multimedia filters

Membrane Technology

- OR
- UF
- EDI

Ionic Exchange

- Softeners
- Selective resins
- Mixed or packed beds

Disinfection

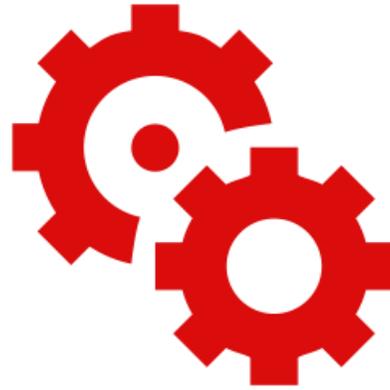

- UV
- Ozone
- Cloration

OUR LOCATION

Calle Restauración 249, Santo Domingo,
República Dominicana | RNC:1-31-3253-1
